21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Lasalocid

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of two supplemental new animal drug applications (NADA's) filed by Hoffmann-La Roche, Inc. One supplemental NADA provides for the addition of certain lasalocid-containing Type A medicated articles to dry, powdered milk replacer before reconstitution. The reconstituted Type C medicated feed is used to control coccidiosis in nonveal calves. Additionally, FDA is amending the regulations to reflect approval of another supplemental NADA which modifies the lasalocid feeding directions for control of coccidiosis in cattle.

EFFECTIVE DATE: October 20, 1995.

FOR FURTHER INFORMATION CONTACT: Melanie R. Berson, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-594-1643.

SUPPLEMENTARY INFORMATION: Hoffmann-La Roche, Inc., Nutley, NJ 07110, is the sponsor of NADA 96-298, which currently provides for the use of several concentrations of lasalocid sodium-containing Type A medicated articles in making Type C medicated cattle feeds (68 to 113 grams of activity per ton) for the control of coccidiosis caused by *Eimeria bovis* and *E. zuernii*. The firm has filed a supplemental NADA that expands this use of the drug to nonveal calves using milk replacer powder.

Additionally, FDA concurred with another supplemental NADA which was filed to modify the feeding directions for lasalocid medicated feed when used to

control coccidiosis in cattle. The supplemental NADA modifies the feeding directions in the table in § 558.311(e)(1) by changing “feed continuously” to “hand feed”.
The supplemental NADA’s are approved as of August 7, 1995, and the regulations are amended in § 558.311 (21 CFR 558.311) to reflect the approvals.
Under 21 CFR 514.106(b)(2), these are Category II changes. Approval of these changes is not expected to have any adverse effect on the safety or effectiveness of this new animal drug. Accordingly, these approvals did not require a reevaluation of the safety and effectiveness data in the parent application.
Under section 512(c)(2)(F)(iii) of the Federal Food, Drug, and Cosmetic Act

(21 U.S.C. 360b(c)(2)(F)(iii)), these approvals for food-producing animals do not qualify for marketing exclusivity because the supplemental applications do not contain new clinical or field investigations (other than bioequivalence or residue studies) and new human food safety studies (other than bioequivalence or residue studies) essential to the approvals and conducted or sponsored by the applicant.
